### **First Quarter 2022 Financial Results**

**Net product revenue** increased by \$13.9 million or 172% for the three months ended March 31, 2022 compared to March 31, 2021. The increase was the result of higher sales of Gvoke and sales attributable to the products, Keveyis and Recorlev, that we acquired in Q4, 2021. On a pro forma basis, net product revenue increased 33% or \$5.5 million for the three months ended March 31, 2022 compared to March 31, 2021. This increase was driven by higher sales of Gvoke, Keveyis and the launch of Recorlev.

**Cost of goods sold** increased by \$4.4 million or 244% for the three months ended March 31, 2022 compared to March 31, 2021. An increase in sales and product mix comprised \$3.1 million and \$0.8 million of the change.

**Research and development** expenses increased by \$2.2 million or 55% for the three months ended March 31, 2022 compared to March 31, 2021. Higher pharmaceutical process development and clinical service costs accounted for \$2.0 million of the increase for the three months ending March 31, 2022.

**Selling, general and administrative** expenses increased by \$16.8 million or 88% for the three months ending March 31, 2022 compared to March 31, 2021. We incurred \$11.5 million of increased commercial-related costs, including an increase to our sales force and increased commercial support for Gvoke, Keveyis and the launch of Recorlev. In addition, \$2.3 million of the increase related to the acquisition of Strongbridge, primarily restructuring and related employee costs. The remaining change was due to an increase in general expenses given the growth of the Company.

**Net Loss** for the first quarter ended March 31, 2022, was \$33.7 million, or \$0.25 per share, compared to a net loss of \$18.4 million, or \$0.30 per share, for the same period in 2021.

**Cash, cash equivalents, and short-term investments** at March 31, 2022 was \$132.1 million compared to \$102.4 million at December 31, 2021. Total shares outstanding at April 30, 2022 was 135,530,756.
